

WELCOME TO BARBAKAN MINIATURES HOBBIES THE 1/35 WWII SCALE PRODUCTION
HIGE QUALITY HYDROCAL & RESIN END PLASTICS

Barbakan

We are a company that specialize in highly detailed and handcrafted 1/35 scale WWII urban roads and sidewalks. Additionally, we offer a wide range of building material such as 1/35 scale bricks that were used by Western and Eastern Europe during the Second World War. Potential customers who seek platforms for singular 1/35 scale units, or who just want to personalize their own diorama utilizing things like ruined walls and free-flowing rubble, should stop by to look through our wide selection of products.

Catalogue 2013

1/35 WWII Stone Roadway with Sidewalk 220mm x 140mm

Package contains a cobblestone roadway with a side and main road storm drain. Perfect fit for a tank, artillery piece or even several units. The road is made up of hydrocal whereas the storm drains are composed of resin.

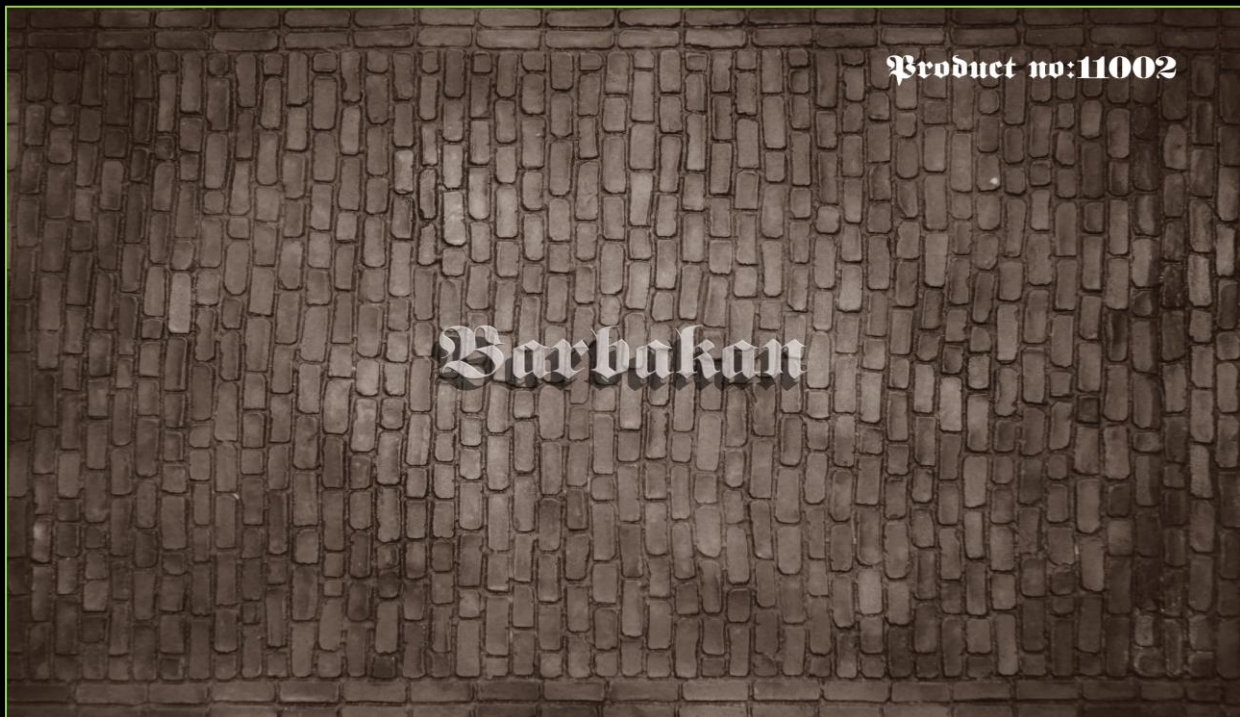

Product no: 11001

1/35 WWII Cobblestone Road 220 mm x 140 mm

Product no: 12001

1/35 WWII Scale Bricks Western Europe

Package contains approximately 250 kingdom sized format bricks that were used during the years 1850-1950 in urban and rural areas. The bricks are composed of ceramic of dimensions 0.61 x 0.33 x 0.2 cm. Bricks have undergone grinding and sawing and are painted. Produced in tan, gray, orange and red colors.

Product no: 12002

WWII Europe Cobblestone Road.

Following the Second World War, roads were paved with a thick layer of asphalt. However over time, natural forces such as heavy rainfall and snow storms consisted of enough potential to erode certain strips of pavement, leaving only puddles of history in their wake. Similar to the pictures below, the cobblestone roads found in this catalogue can be transformed into worn out, modern roads that can be used with multiple timelines.
